Permission Form

Your child has expressed interest in learning about computer programming. Ever worried your high-schooler isn't learning what they need to be learning to be competitive in the 21st century world? Have a child with an interest in programming, but the local area and schools don't have the resources to foster their curiosity?

We hope to help teenagers and families that need help kickstarting or developing their programming career right in their backyard. No one, no matter where they live, should miss the opportunity to learn this valuable skill.

I give my child permission to attend Pisgah Tech Tutoring summer instruction in web software development. The program will be two nights a week, from June 11th - Aug. 9th (a week off for 4th of July), from 5:30pm - 7:30pm. The cost is FREE.
